

WOTI (“Word of the Issue)

Access For All - whether you are a person with disability, an older frail person or you are a parent with a young family, access is so important for physical and psychological well-being. Good *Access** shows a proactive, inclusive, caring community which helps make a citizen feel safe enough to want to contribute to their and others welfare.

*Can also be seen as ‘open access’ analogous to the computer term so the Word Of The Issue becomes *Open Access For All* a theme of this Issue.
